**Stocks Shares are going fast for Digital Sublimation;
Grant for Further Research Received**

WEST LAFAYETTE, Ind. — From the 6000 shares initially released on the March 3 IPO for Digital Sublimation, only 2400 shares remain. Contact a team member of Digital Sublimation to discuss our investor relations. In addition to the IPO, activity is buzzing around Digital Sublimation from the ITaP Teaching and Learning Technologies Digital Content Development Grant that was awarded to Associate Professor Terry Burton and Graduate Student Frank Garofalo for the continued research of an educational Adobe AIR COGENT application after the completion of the Spring 2008 semester.

The testing methodology packet Digital Sublimation has produced to outline how the CG Central application will be validated has been submitted to the Purdue IRB. Digital Sublimation is currently working with the Purdue University Statistical Consulting Services to secure the support from a graduate student in the Department of Statistics.

After the Purdue Spring Break, as testing will be underway for the CGCentral application Digital Sublimation will be recruiting the assistance of students in CGT to finalize production of four interactive multimedia games from an additional project.

Digital Sublimation is an interactive multimedia company based in West Lafayette, Indiana and is focused on providing quality solutions to our customers through the advances of technology. Founded in 2008, the services Digital Sublimation offers are geared to assist companies to create new mediums of communication through interactive applications.
